Matrix rotate (90° rotate)

Problem Statement / I/O:

```
input = [[1, 2], [3, 4]]  
output = [[3, 1], [4, 2]]
```

Original (0°)

1	2
3	4

Rotated 90°

3	1
4	2

Swap Logic:

`temp[i][j] = arr[j][i]`

Step-by-Step Rotations:

1	2
3	4

Original

3	1
4	2

90°

4	3
2	1

180°

2	4
1	3

270°

1	2
3	4

360°

Index Mapping Breakdown:

1) arr[0] [0]	2) arr[0] [1]	3) arr[j][0] (arr[1] [0])	4) arr[i][0] (arr[0] [0])
3) arr[1] [0]	4) arr[1] [1]	3) arr[i][1] (arr[1] [1])	2) arr[0][1] (arr[0] [1])

i = 0 → 1

j = 1 → 0

output i = 0 → 1

j = 0 → 1

n = 2
